Russian Academy of Sciences. Izvestiya. Mathematics

CONTENTS

Volume 45, Number 1, 1995

A. G. **Baskakov**, Spectral analysis of perturbed nonquasianalytic and spectral operators 1

A. V. **Zhiber**, Quasilinear hyperbolic equations with an infinite-dimensional symmetry algebra 33

K. Yu. **Osipenko**, On n-widths, optimal quadrature formulas, and optimal recovery of functions analytic in a strip 55

V. A. **Smirnov**, Homology of B-constructions and co-B-constructions ... 79

S. D. **Troitskaya**, On non-almost-periodicity of solutions of the Sobolev problem in domains with edges 97

B. N. **Khabibullin**, Nonconstructive proofs of the Beurling-Malliavin theorem on the radius of completeness, and nonuniqueness theorems for entire functions 125

S. N. **Shevchenko**, Quadrics of codimension two, and their automorphisms 151

A. M. **Gaĭsin**, Behavior of the logarithm of the modulus of the sum of a Dirichlet series converging in a half-plane 175

V. I. **Skalyga**, On deformations of nonsmooth optimization problems having an isolated extremal 187

Vik. S. **Kulikov**, A geometric realization of C-groups 197

V. Yu. **Baranovskiĭ**, The cohomology ring of the moduli space of stable bundles with an odd determinant 207

S. **Salerno and A. Vitolo**, On the distribution in arithmetic progressions of reducible quadratic polynomials 215

V. G. **Kac**, Corrections to the paper of B. Yu. Veisfeiler and V. G. Kac "Exponentials in Lie algebras of characteristic p" 229

Volume 45, Number 2, 1995

A. A. **Arkhipova**, On the regularity of the solution of the Neumann problem for quasilinear parabolic systems 231

S. A. **Gritsenko**, An approximate functional equation for a product of two Dirichlet L-functions 255

M. Ts. **Iotov [M. C. Jotov]**, Nadel sheaves and properties of vector bundles on Fano varieties 281

D. Yu. **Radionov**, On the Torelli and Schottky problems for Prym varieties 297

L. I. **Sazonov**, Justification of the linearization method in the flow problem 315

D. A. **Timashev**, Generalization of the Bruhat decomposition 339

V. I. **Trofimov**, Graphs with projective suborbits. Cases of small characteristics. I 353

V. T. **Shevaldin**, Lower estimates of the widths of classes of functions defined by a modulus of continuity 399

S. M. **Voronin**, On quadrature formulas 417

S. A. **Shkarin**, On a class of continuous nowhere differentiable functions 423

Volume 45, Number 3, 1995

A. V. Arutyunov, On the theory of degenerate quadratic forms in the classical calculus of variations 433

V. K. Zakharov, The Kaplan extension of the ring and Banach algebra of continuous functions as a divisible hull 477

A. N. Kochubeĭ, Gaussian integrals and spectral theory over a local field 495

S. N. Kudryavtsev, Recovering a function with its derivatives from function values at a given number of points 505

V. Ya. Pidstrigach, Patching formulas for spin polynomials, and a proof of the Van de Ven conjecture 529

A. M. Sedletskiĭ, Nonharmonic Fourier series without the Riemann-Lebesgue property 545

V. I. Trofimov, Graphs with projective suborbits. Cases of small characteristics. II 559

A. N. Tyurin, Canonical spin polynomials of an algebraic surface. I 577

Yu. A. Shevchenko, On boundary behavior of typical mappings 623
